

Tent of Nations Update - July 1, 2024

I am writing to inform you about a recent development concerning the re-registration session for our Nassar family land. We received a message from our attorney stating that the Land Registration Committee of the Israeli Civil Administration in the West Bank has decided to cancel the session scheduled for tomorrow, July 2, 2024.

Our attorney's message reads as follows:

"After waiting for an entire year, it is very unfortunate that the Land Registration Committee delays the session one day before the session without giving any reasons beyond: 'due to reasons related to the constraints of the committee'.

As you are aware, the sessions until today have proved beyond any doubt the Nassar family's exclusive claims to the land, and it was very clear that the Land Committee would have to complete the re-registration process.

It is evident that, as part of a political decision not to re-register the Nassar family's land, the Land Committee finds that the only way to prevent the re-registration is to continue with endless delays and cancel the sessions for no reason whatsoever. Clearly, the Land Registration Committee is aware that there is no legal basis to prevent the re-registration of the Nassar family land, and therefore it simply chose to cancel the session after we have been waiting for nearly a year. No new date has been given yet."

In light of this situation, we kindly request the following actions:

1. Please forward this information to your representatives and urge them to contact the Israeli authorities to demand an immediate new date for the re-registration session. Justice must be served after more than 30 years of struggling in the Israeli courts.
2. While the case is pending in court, Israeli settlers may continue to create facts on the ground. Please ask your government to provide protection for the Nassar family and their farm.
3. The Tent of Nations urgently needs an international presence of volunteers at the farm for protection and to assist with cultivating, farming, and developing the land.

We are going through a difficult time and greatly appreciate your support in this long journey for justice.

Thank you for your continued accompaniment and solidarity
